

Ryan Hernandez-French

Senior Software Engineer

Remote (US) · Detroit, MI

[GitHub](#) · [LinkedIn](#) · [Portfolio](#)

Summary

Senior Software Engineer with 7+ years of experience delivering scalable, user-centric web applications and owning features end-to-end across frontend and backend systems.

Combines strong software engineering fundamentals with applied AI/ML experience, including building and deploying machine learning models, designing data pipelines, and integrating AI-driven features into production environments. Proven ability to ship high-impact products at the intersection of software engineering and AI.

Professional Experience

AI Engineering Fellow

— Resilient Coders

Remote | March 2026 - May 2026

- Built and deployed applied AI/ML solutions using Python and modern ML tools, integrating AI-driven features into real-world applications.
- Designed data pipelines for ingestion, preprocessing, and feature engineering to support experimentation and improve model performance.
- Trained and refined models using both traditional ML techniques and prompt engineering, improving accuracy through iterative testing.
- Shipped AI-powered tools in agile sprints, contributing across the full product lifecycle from idea to deployment.

- Collaborated with cross-functional teams to communicate technical results to non-technical audiences.
- Completed fellowship projects while balancing new fatherhood-developing discipline, focus, and the ability to execute under real-life constraints.

Tech: Python, PyTorch, [Next.js](#), Typescript, Node, Prompting, Machine Learning

Software Engineer II

— Ascent Cloud

Hybrid · Detroit, MI | Jan 2024 – Present

- Led development of core frontend features for enterprise SaaS applications using React, JavaScript, and Tailwind CSS, delivering responsive and accessible user experiences.
- Built and maintained a reusable React component library and shared design patterns, reducing duplicated UI logic and improving development velocity across the team.
- Owned frontend integration with REST APIs and backend services, collaborating closely with backend engineers working with Node.js and Salesforce-based data models.
- Refactored legacy frontend components to improve performance, maintainability, and consistency, resulting in faster load times and improved user experience.
- Wrote and maintained unit tests with Jest, reducing regressions and improving overall code reliability.
- Mentored junior engineers through code reviews and pair programming, helping raise frontend quality standards and speed up onboarding.

Tech: React, JavaScript, Tailwind CSS, Node.js, REST APIs, Salesforce, Jest, AG-Grid

Software Engineer (Contract)

— Chargely

Remote | Jun 2023 – Sep 2023

- Designed and implemented an MVP RESTful API using Node.js and Express to support authentication and data ingestion for a production frontend.
- Collaborated with a fully remote, cross-functional team to rapidly deliver and iterate on an MVP under tight timelines.
- Integrated frontend applications with backend services to support real-time data workflows.

Tech: Node.js, Express, JavaScript, REST APIs, Flutter

Frontend Engineer II

— Flexcar

Remote | Aug 2022 – Apr 2023

- Acted as a frontend point of contact within a cross-functional product team, contributing to UI/UX decisions and technical tradeoffs.
- Built and maintained React-based user interfaces in a fast-paced, rapidly evolving product environment.
- Worked closely with designers to implement new UI/UX features while maintaining visual consistency and usability.
- Supported marketing and analytics initiatives through integrations with Google Tag Manager and Facebook Pixel.

Tech: React, JavaScript, GraphQL, Node.js, MongoDB, GTM, Facebook Pixel

Software Engineer

— National Grid

Remote | Nov 2020 – Aug 2022

- Helped design, build, and maintain an internal Progressive Web Application and mobile app used by field teams in production.
- Collaborated with designers and product stakeholders to adapt applications to real-world user needs gathered through field interviews.
- Established frontend coding standards and testing practices, improving long-term maintainability and team consistency.
- Participated in interviewing and onboarding new engineers, contributing to team growth and knowledge sharing.

Tech: React, React Native, JavaScript, Node.js, REST APIs, Azure, SQL, Bootstrap

Software Engineer Immersive Instructor

— General Assembly

Remote | Feb 2020 – Jun 2022

- Mentored and trained early-career developers through lectures, live code-alongs, pair programming, and structured assignments.
- Conducted code reviews and guided refactoring efforts, reinforcing best practices in frontend and full-stack development.
- Prepared and updated lesson plans to align with modern industry standards and tooling.

Tech: React, JavaScript, Node.js, Python, Ruby on Rails, MongoDB, SQL

Web Applications Developer

— Houghton Mifflin Harcourt

Boston, MA | Nov 2018 – Jan 2020

- Built and maintained enterprise-level web applications, microsites, and microservices supporting large content platforms.
- Improved existing systems and architecture to support scalability and long-term maintainability.
- Created documentation and technical guidelines used by engineering, business, and marketing teams.

Tech: JavaScript, Node.js, jQuery, HTML, CSS, Elasticsearch, REST APIs

Core Skills

Frontend (Primary)

JavaScript (ES6+), TypeScript, React, Hooks, Context API, HTML5, CSS3, Tailwind CSS, Responsive Design, Accessibility (a11y)

Backend (Supporting)

Node.js, Express, REST APIs, GraphQL, MongoDB, PostgreSQL

Testing & Tooling

Jest, Git/GitHub, CI/CD, Agile/Scrum

Platforms & Cloud

AWS, Salesforce Platform, SaaS Application Development

Education & Certifications

- Wayne County Community College District (WCCCD) — CIS: Software Developer
- Per Scholas — Software Engineer
- Resilient Coders — Full Stack Software Developer

Certifications:

Meta Backend Engineer · Meta Frontend Engineer · ElasticSearch Engineer I · Google AI Essentials
· Google AI Professional
